# One size doesn't fit all when it comes to underwriting.

PLUS is designed to underwrite Protective® Classic Choice term or Protective® Custom Choice UL (10-30) applicants with the least amount of invasive requirements possible. Using advanced analytics, our flexible solution customizes the experience for each applicant based on their individual circumstances.

#### **KEY BENEFITS OF PLUS:**

- Fluids may not be required
- APSs may not be required
- All cases facilitated via Protective's automated underwriting platform optimizing speed to issue

### How our process works

- Within 24 hours of the application being submitted, your client will receive a call to complete their TeleLife interview. At the beginning of the interview, your client will be prompted to provide HIPAA and CRA authorization.
- During the TeleLife interview, PLUS gathers the required data. Along with the application disclosures, PLUS uses the data to determine the underwriting requirements and the best available class for the applicant.
- Application package sent out for signature.
- At the end of the TeleLife interview, you can expect your client to follow one of these paths:
  - 1. Your client is offered coverage on an accelerated underwriting basis, eliminating the need for exam and labs, and the policy is ready to be issued.
- 2. Your client will continue on the traditional (non-accelerated) underwriting path and will require exam, fluids, labs and/or medical records to ensure accurate underwriting.

Some clients may appear to be eligible for an accelerated underwriting offer, but will still be required to complete the exam and labs. The need for exam and labs could be from the underwriting data gathered (for example, prescription drug reports), a disclosure by the applicant, a combination of factors, or they could be randomly held out of accelerated underwriting by PLUS. Even if your client does not get an accelerated underwriting offer, they could still qualify for the best class through exam and labs underwriting.

Accelerated underwriting cases will be monitored post-issue to confirm the disclosures provided by the applicant. Information gathered via accelerated underwriting cases may be reviewed and addressed with your client if we discover any material differences.

The checklist below will help you determine if your client may qualify for the accelerated process through PLUS, possibly eliminating the need for fluids and APS.

For more information, please contact the Protective Life Sales Desk at **877.778.3500, option 1.** 

Clients who do not fit all eligibility requirements may need to submit additional information like a paramedical exam, or other labs or medical records. Protective will randomly hold out a small percentage of applicants who would otherwise qualify for accelerated underwriting and we will require an exam, fluids, labs and medical records for those applicants.
