Protection VUL policies automatically include a no-lapse guarantee called the Death Benefit Protection rider which is optimized for an age-80 guarantee — or, if elected for an additional cost, an Enhanced Death Benefit Protection rider which is optimized for an age-100 guarantee. Both technically provide a guarantee to age 121 if enough premium is paid. Each of these options guarantees that the policy will not default, even if the cash surrender value falls to zero or below, provided that the Net Death Benefit Protection Value remains greater than zero and policy debt does not exceed the policy value. Once terminated, the Death Benefit Protection rider or Enhanced Death Benefit Protection rider cannot be reinstated. See the product guide for additional details.

Guaranteed product features are dependent upon minimum premium requirements and the claims-paying ability of the issuer.

Variable universal life insurance products are subject to market risk and are unsuitable as a short term savings vehicle. Cash values are not guaranteed and will fluctuate, and the policy may lose value.
